Well you know we are at the bottom of the cycle when the glbal updates are virtually nonexistent. Were it not for the noble efforts of a few there would be nothing to report. James, W6OU, was the only one in our club to snag Christmas Island, VK9X, adding a new entity that also was worked by many of the ClubLog top contenders.

As far as the top contenders two entities were added. We still are missing 17 that they have worked and we are down to one that we worked and they didn't. Again this demonstrates the effect of summer and the sunspot cycle. We are all holding out for the Fall.

That said the desperate among our numbers have been working up a storm on the new mode, FT8. Even though it is 10 dB worse than JT65 DXers have flocked to this mode leaving the JT65 band almost completely empty. There is something to be said about a QSO that is 1 minute rather than 5 minutes!

Get Schroeder Award Standings are calculated by entries in Club Log.

Propagation

Still Flat Flat Flat

This month we had a SFI spike that hit the high 80s. Hopefully that spike will continue and land on DX contest week-ends in the fall. Aside from that we are in the bottom for real!

FT8 is taking off as a new mode. The change from RTTY and JT65 was almost instantaneous. K1JT must be proud of his accomplishments and how it has changed ham radio. When the rest of the band is dead there are people going at it on FT8. Still, JT65 is really them go to mode for weak signal work.
